

UNDERSTORY PEOPLE - HIGH-AIR HEIRLOOM MINIATURES

Direction: keep rounded readability, replace toy plastic with crafted survival materials.

Rendering target

Generated image 1: middle/right panels

Keep the simple silhouette.
Push the materials and lighting
toward cloth, brick, moss,
stone, leather, and lantern
atmosphere. Gameplay can sit
near the middle; marketing can
push toward cinematic.

Archetype DNA

Material people concepts

Best source for crew roles:
shorer, mechanic, seed-keeper,
timberwright, patchworker.
Material identity should be
worn as work gear, not literal
superhero class skin.

Readability DNA

Builder helmet concepts

Useful helmets, visors, packs,
and big readable tools. Replace
clean plastic colors with
ceramic filters, smoked glass,
leather straps, soot, cloth,
and muted mineral accents.

Survival silhouette

Job rescue concepts

The Tiny Giant-Backpack and
chunky builder ideas are
useful. Avoid plush, puppet,
crystal knight, and bubble-
helmet mascot energy for core
humans.

Caution: toy sci-fi

Supernauts adjacent concepts

Good mobile readability, wrong
soul. Do not chase clean
primary-color astronaut suits
or pedestal toy presentation.

Caution: arcade space

Generated image 3

Strong tools and heroic
silhouettes, but too loud, too
glossy, too space-action.
Understory wants pressure,
scarcity, and quiet craft.

Humanity

posture + notes + props

Gear

masks, wraps, goggles

Materials

cloth, ceramic, leather

Motion

slow, weighted, careful

Tone

warm, strange, not silly
